The Financial statements have been prepared in Euro. Also, the audit report is based on figures in Euro. For the purpose of user, the financial statements and notes as on have been converted in Indian Rupees at following exchange rate as on 31 March 2025.

1 Euro = Rs. 92.0900

Background

Bajaj Auto International Holdings B.V. is a Netherlands based wholly owned subsidiary of Bajaj Auto Limited incorporated on 25 October 2007 with the object, inter alia, of carrying out investments in ventures abroad. During the year ended 31 March 2024, the Company's equity in Austria based Pierer Bajaj AG remained at 49.90% (as at 31 March 2023 – 49.90%).

The registered office of the Company is located at Sluisweg 20, 6581 Ka, Malden, The Netherlands.

Basis of preparation

These special purpose IND AS financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) read with Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and other relevant provisions of the Act. These special purpose financial statements are not a complete set of general purpose financial statements of the Company in accordance with the accounting principles generally accepted in India. These special purpose IND AS financial statements are prepared solely for the information and use of the Board of Directors of the holding company i.e. Bajaj Auto Limited in connection with consolidation of its group financial statements, accordingly these are not suitable for any other purposes.

The financial statements have been prepared on a historical cost basis.

The financial statements are presented in EUROS, which is also the Company's functional currency and all values are rounded to the nearest Euro except when otherwise indicated.

All assets and liabilities, other than deferred tax assets and liabilities if any, have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III (Division II) to the Act. Deferred tax assets and liabilities are classified as non-current assets and liabilities. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for current and non-current classification of assets and liabilities.

1. Summary of material accounting policies followed by the Company

This note provides a list of the material accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

1) System of accounting

- i) The Company follows the mercantile system of accounting and recognizes income and expenditure on an accrual basis except in case of significant uncertainties.
- ii) Financial Statements are prepared on a historical cost basis.
- iii) The financial statements are presented in Euro, which is also the company's functional currency.
- iv) All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle. Based on the nature of operations and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.

- v) Estimates and Assumptions used in the preparation of the financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the Financial Statements, which may differ from the actual results at a subsequent date.

2) Revenue recognition:

The Company recognizes income on accrual basis. However, where the ultimate collection of the same lacks reasonable certainty, the Company recognizes revenue when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the Company.

Dividends are recognized in the Statement of Profit and Loss only when the right to receive payment is established and it is probable that the economic benefits associated with the dividend will flow to the Company and that the amount of dividend can be measured reliably.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis.

The Company recognizes income on accrual basis. However, where the ultimate collection of the same lacks reasonable certainty, revenue recognition is postponed to the extent revenue is reasonably certain and can be reliably measured.

3) Investments

Investment in associate is recognized at cost. Cost represents the amount paid for the acquisitions of said investments.

The company assesses at the end of each reporting period, if there are any indications that the said investments may be impaired. If so, the company estimates the recoverable value / amount of the investments and provides for impairment, if any i.e. the deficit in the recoverable value over cost.

Upon loss of significant influence over the associate, the Company measures and recognize balance retained investment at its fair value. Difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment or proceeds from disposal is recognized in profit or loss.

At fair value through profit and loss (FVTPL)

Financial asset, which does not meet the criteria for categorization at amortized cost or FVTOCI, is classified as at FVTPL. In addition, the Company may elect to classify a financial asset, which otherwise meets amortized cost or FVTOCI criteria, as FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). Financial assets included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

4) Foreign currency transactions

Items included in the financial statements are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). On initial recognition, all foreign currency transactions are recorded at the foreign exchange rate on the date of the transaction. Monetary assets and liabilities in foreign currency outstanding at the close of the year are revalored at the appropriate exchange rate prevailing at the close of the year. The gain or loss on decrease/increase in reporting currency due to fluctuations in foreign exchange rates, in case of monetary assets and liabilities in foreign currency, are recognized in the Statement of Profit and Loss.

5) Taxation

- i) Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the country where the Company operates and generates taxable income.
- ii) Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.
- iii) Deferred tax is provided using the liability method on temporary differences arising between the tax base of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rates that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled.
Deferred tax assets are recognized for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences.

6) Provisions

The Company creates a provision when there is a present obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

7) Earnings per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period. The weighted average number of equity shares outstanding during the period and all periods presented is adjusted for events such as bonus shares, other than conversion of potential equity shares that have changed the number of equity shares outstanding without corresponding change in resources.

8) Cash and cash equivalents

For presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

9) Changes in accounting policies and disclosures

New and amended standards

Several amendments and interpretations apply for the first time annual periods beginning on or after 1 April 2024, but do not have an impact on the financial statements of the Company. The Company has not early adopted any standards or amendments that have been issued but are not yet effective.

18 Segment Information

The Company is essentially a holding and investment company focusing on earning income through dividends, interest and gains on investments held. Hence, the Company's business activity falls within a single business segment i.e. investments.

19 Fair value measurement and financial risk management

The carrying amounts of fixed deposits, other financial assets and cash and cash equivalents are considered to be the same as their fair values, due to their short-term nature and categorised at amortised cost. The exposure to foreign currency risk at the end of the reporting period is Nil to the Company. The Company has deployed its surplus funds into fixed deposits, etc. The Company is only exposed to price risk on such investments, which arises on account of movement in interest rates, liquidity and credit quality of underlying securities.

ii) Fair value hierarchy

To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standard. Convertible Bonds subscribed by BAHBV of PBAG of Euro 50,000,000 is classified as Level 2 fair value measurement.

Explanation of Level 2: The fair value of financial instruments that are not traded in an active market are determined using valuation techniques which maximise the use of observable market data (either directly as prices or indirectly derived from prices) and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Subsequent events

Disclosure of subsequent events

-On 3 April 2025, the Company received the remaining EUR 35,000,000 from Bajaj Auto Limited under the EUR 150,000,000 loan.

Notes to Financial statements for the year ended March 2025

The financial statements have been prepared in Euro. Also the audit report is based on figures in Euro. For the purpose of user, the financial statements and notes have been converted in Indian Rupees at following exchange rate as on 31 March 2025.

1 Euro = Rs. 92.0900

Background

Bajaj Auto International Holdings B.V. ("the Company") is a Netherlands based wholly owned subsidiary of Bajaj Auto Limited (BAL) incorporated on 25 October 2007 with the object, inter alia, of carrying out investments in ventures abroad. The Company's equity in Austria based Pierer Bajaj AG remained at 49.90% (as at 31 March 2022 – 49.90%).

The consolidated financial statements comprise financial statements of the Company and its associates for the year ended 31 March 2025.

The consolidated financial statements include results of the associates of the Company, consolidated in accordance with Ind AS 28 "Investment in Associates and Joint Ventures".

Name of the company	Country of Incorporation	% Shareholding of the Company	Consolidated as
Pierer Bajaj AG	Austria	49.90%	Associate

1) Summary of significant accounting policies followed by the Company

Basis of preparation

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the "Act") read together with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and other relevant provisions of the Act, on an accrual basis.

The financial statements have been prepared on a historical cost basis.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle. Based on the nature of operations and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.

Significant accounting policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

1) Investment in associates

Investments in associates are accounted for using the equity method. An associate is an entity over which the Company is in a position to exercise significant influence over operating and financial policies. The considerations made in determining whether significant influence is being exercised are similar to those necessary to determine control over the subsidiaries. Goodwill arising on the acquisition of associates is included in the carrying value of investments in associate.

The Company's investments in its associate are accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Company's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Company's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Company's reserves. In addition, when there has been a change recognised directly in the equity of the associate, the Company recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Company and the associate are eliminated to the extent of the interest in the associate.

If an entity's share of losses of an associate equals or exceeds its interest in the associate (which includes any long term interest that, in substance, form part of the Company's net investment in the associate), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate. If the associate subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Company's share of profit or loss of an associate is shown on the face of the statement of profit and loss.

The financial statements of the associate are prepared with a three months' time lag for consolidation into the Company financial statements. When necessary, adjustments are made to bring the accounting policies in line with those of the Company. The Company has not identified any material adjustments during the year; in regard to the alignment of accounting policies.

After application of the equity method, the Company determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Company determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Company calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the loss in the statement of profit or loss.

Upon loss of significant influence over the associate, the Company measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

2) Other significant accounting policies

Other significant accounting policies followed by the company are exactly similar to the significant accounting policies of the parent i.e. the Company and hence have not been reproduced here. Refer note 1 of standalone financial statements of the Company for the year ended 31 March 2025 for details in regard to other significant accounting policies.

The Consolidated Financial Statements of Bajaj Auto International Holdings B.V. include 49.90 % interest in Pierer Bajaj AG (a company incorporated in Austria) as an associate.

18 Segment Information

The Company is essentially a holding and investment company focusing on earning income through dividends, interest and gains on investments held. Hence, the Company's business activity falls within a single business segment i.e. investments.

19 Fair value measurement and financial risk management

The carrying amounts of fixed deposits, other financial assets and cash and cash equivalents are considered to be the same as their fair values, due to their short-term nature and categorised at amortised cost. The exposure to foreign currency risk at the end of the reporting period is Nil to the Company. The Company has deployed its surplus funds into fixed deposits, etc. The Company is only exposed to price risk on such investments, which arises on account of movement in interest rates, liquidity and credit quality of underlying securities.

ii) Fair value hierarchy

To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standard. Convertible Bonds subscribed by BAHBV of PBAG of Euro 50,000,000 is classified as Level 2 fair value measurement.

Explanation of Level 2: The fair value of financial instruments that are not traded in an active market are determined using valuation techniques which maximise the use of observable market data (either directly as prices or indirectly derived from prices) and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Subsequent events

Disclosure of subsequent events

-On 3 April 2025, the Company received the remaining EUR 35,000,000 from Bajaj Auto Limited under the EUR 150,000,000 loan.
